Using Eq. , the optimal canal cross section for minimum water loss for a specified value of  $m$ , can obtained. Once, the value of  $b$  and  $y_n$  are calculated, the corresponding value of flow velocity,  $V$ , is determined, which must satisfy the allowable velocity.

**Design and analysis of a canal section for minimum water**

An artificial neural network is a network of simple elements called artificial neurons, which receive input, change their internal state (activation) according to that input, and produce output depending on the input and activation.
