Cognitive computing represents self-learning systems that utilize Machine Learning models to mimic the way brain works. Eventually, this technology will facilitate the creation of automated IT ...

Introduction to Cognitive Computing - DZone Big Data

Build the foundation of a smart enterprise with IBM From servers and mainframes to storage systems and software, IBM provides the building blocks of a next-generation IT architecture that empowers your enterprise.

IT Infrastructure | IBM

Distributed computing is a field of computer science that studies distributed systems. A distributed system is a system whose components are located on different networked computers, which communicate and coordinate their actions by passing messages to one another. The components interact with one another in order to achieve a common goal.
