Foldback is a current limiting feature (a type of overload protection) of power supplies and power amplifiers. When the load attempts to draw overcurrent from the supply, foldback reduces both the output voltage and current to well below the normal operating limits.

Applied Power Electronics Conference (APEC) APEC was created by IEEE in 1986 to help fill the void left by the demise of PowerCon® (1974-1985). It caters to the practical aspects of power electronics and serves as a conference where the working power supply designer can go for a yearly refresher in his/her craft.

The flyback converter is used in both AC/DC and DC/DC conversion with galvanic isolation between the input and any outputs. The flyback converter is a buck-boost converter with the inductor split to form a transformer, so that the voltage ratios are multiplied with an additional advantage of isolation.
